

**Dcode connects the tech industry and government to drive commercial innovation in the federal market.**

**About**

Dcode solutions for tech companies, government organizations, and industry partners are all designed to improve the way government runs, using product and practices from the private sector. Dcode has worked with nearly 100 tech companies and hundreds of government organizations, driving more than 200 new implementations of commercial technology in government and millions in federal contracts.

**Ways to work with us**

**We offer integrated solutions for all parts of our community, and when they come together... that's where the magic happens.**
