

## Benefits of the Multi Environment Ammunition

Unique technology that has capabilities that will reduce risk in several tactical situations and have more effect on target against threats that has not been possible to fight in the past.

- Force Protection Enabler
- Increased lethal effects on desired targets.
- Increased soldier safety due to Tactical Superiority.

### In Air

- Excellent Dispersion
- Added penetration.
- Capability to shoot far into water.
- Low angle penetration (Cylindrical shapes).
- Penetration of sandbags.
- Penetration of fibred structures.
- Effective against multiplate targets.
- Reduced risk of collateral damage due to reduced risk of ricochet in water.
- Neutralize targets below surface.

### Submerged

- Defend against wildlife (Trained and wild).
- Defend against enemies in water.
- Neutralize targets from above surface.
- Take out targets in air before surfacing.
- Neutralize targets sub surface.
- Mount gun on UUV, Submarine.

**Example of new tactical scenarios the MEA™ ammunition enables.**
