

# SOFTWARE AG GOVERNMENT SOLUTIONS AT A GLANCE

Software AG Government Solutions is a market leader in best-in-class software solutions that support the United States Federal Government and its supplier communities. Our world-class product suites are based on a fully integrated Secure Digital Platform that inherently removes the barriers of connecting data from every source across an extended enterprise. From rapidly automating a single manual process to connecting hundreds of disparate and independent IT systems, we pride ourselves on a reputation of delivering success.

## Helping Customers Successfully Process Billions of Transactions in Mission Critical Applications Every Day

We are focused on building long-term trusting relationships with our customers. That starts with our highly effective “Prove IT First and Prove IT Fast” approach to solving mission-critical IT challenges. We quickly prove the viability of our solutions in a customer’s environment with superior products and experienced technical resources in minimal time with little to no cost. Embraced by our customers, this approach has been proven to minimize risks associated with IT investments.

## The Software AG Secure Digital Platform

	<p><b>INTEGRATION: WEBMETHODS</b> Connect disparate systems throughout your extended IT ecosystem with guaranteed delivery and full auditability.</p>	
	<p><b>PROCESS: WEBMETHODS</b> Visually create process-driven and case management applications from a simplified forms-based interface with direct connectivity to the underlying IT data and systems.</p>	
	<p><b>BUSINESS &amp; IT TRANSFORMATION: ARIS and ALFABET</b> Leverage leading-edge IT portfolio management, enterprise architecture and business process analysis solutions to optimize your operations.</p>	
	<p><b>ANALYTICS &amp; DECISIONS: APAMA</b> Gain unprecedented real-time visibility and actionable intelligence on big data streaming analytics from any source.</p>	
	<p><b>IN-MEMORY DATA: TERRACOTTA (ENTERPRISE EHCACHE)</b> Immediately scale up and scale out existing Java® applications using the open source ehcache standard for extremely low, predictable latency at any scale.</p>	

## Proven Award-winning Technology

Recognized as leading products by the industry's top analyst firms, our software solutions are vendor- and platform-neutral, and deliver faster time-to-value. By combining proven products, process blueprints and fast implementation paths, we effectively address our customers' toughest mission-critical business challenges.

### Want to ...

Quickly automate manual processes?

Connect silos of information across your enterprise with access to data in real time?

Capture and manage processes?

Capture and manage the components within your IT portfolio?

Speed up and scale mission-critical applications?

Try before you buy?

### Our Digital Platform offers...

A rapid application development factory to help you assemble lightweight applications in either cloud-based or on-premises environments in weeks.

Proven and scalable integration products to connect the dots between applications, partners, devices, services, big data and APIs.

Modeling and analysis capabilities that map business processes and their dependencies to drive process optimization.

The only IT Portfolio Management product ranked by analysts as a leader in IT Portfolio Management and Enterprise Architecture because it's able to successfully align your entire IT environment with mission strategy and cost metrics. An essential tool for FITARA compliance.

Distributed in-memory data management with extremely low, predictable latency at any scale; able to be embedded across COTS and open-source-based applications.

The opportunity to validate that our solutions will work in your environment before making any investment. It is our "Prove IT First and Prove IT Fast" approach.

## Successful Project Delivery with Subject Matter Experts

As a software company, we recognize the importance of providing an extraordinary level of subject matter expertise to ensure the successful implementation and use of our products. This is especially important in large-scale enterprise environments where the confluence of a multitude of IT systems converge. The involvement of our professional services organization enables the full value of your software investment.

Our engagements involve a small number of consultants who focus on initial architectural planning through implementation, training and ongoing operations. We work collaboratively with your internal personnel as well as outsourced systems integrators and partners to ensure success. Our focus is always on delivering results that reinforce the value of our software and never on maximizing billable service hours.

## Partner With Us

Software AG Government Solutions is committed to the expansion of complimentary software and services companies to grow the ecosystem around our products. We have a formal partner program that offers qualified organizations special access to software, support and training.

## Contact Us

Software AG Government Solutions is a U.S. company. Headquartered in Herndon, Virginia, we are an independently operated subsidiary of our billion-dollar corporate parent, Software AG.
